

# Plants

## Types Of Leaf Edges

smooth / entire

toothed / jagged

## Types Of Leaf Veins

parallel veins

net veins

## Textures Of Leaves

The textures of leaf surfaces also vary from plant to plant. Some plants have rough and even hairy leaves while others have smooth, waxy leaves.

## Types Of Leaves

A leaf with only one blade growing out from its own individual leaf stalk is called a **simple leaf**.

When two or more leaves grow out from a single leaf stalk, it is called a **compound leaf**.
