

Learning Number Bonds With Pictures

A large green box contains 6 sun icons arranged in two rows of three. A dashed line separates the top row from the bottom row. To the right, two smaller green boxes are shown. The top box contains 5 sun icons and is labeled with the number 5. The bottom box contains 1 sun icon and is labeled with the number 1. A dashed line connects the two boxes to the equation $6 = 5 + 1$ in the center.

$6 = 5 + 1$

A large green box contains 9 pen icons arranged in two rows: the top row has 6 pens and the bottom row has 3 pens. A dashed line separates the two rows. To the right, two smaller green boxes are shown. The top box contains 6 pen icons and is labeled with the number 6. The bottom box contains 3 pen icons and is labeled with the number 3. A dashed line connects the two boxes to the equation $9 = 6 + 3$ in the center.

$9 = 6 + 3$

A large green box contains 7 carrot icons arranged in two rows: the top row has 4 carrots and the bottom row has 3 carrots. A dashed line separates the two rows. To the right, two smaller green boxes are shown. The top box contains 5 carrot icons and is labeled with the number 5. The bottom box contains 2 carrot icons and is labeled with the number 2. A dashed line connects the two boxes to the equation $7 = 5 + 2$ in the center.

$7 = 5 + 2$

A large green box contains 8 leaf icons arranged in two rows: the top row has 5 leaves and the bottom row has 3 leaves. A dashed line separates the two rows. To the right, two smaller green boxes are shown. The top box contains 4 leaf icons and is labeled with the number 4. The bottom box contains 4 leaf icons and is labeled with the number 4. A dashed line connects the two boxes to the equation $8 = 4 + 4$ in the center.

$8 = 4 + 4$
