

# 3

## SOURCES OF ENERGY

Energy sources can be divided into two groups: renewable and non-renewable. Renewable resources can be replenished and be used over and over again. Non-renewable resources are energy sources that cannot be replenished once we use them up.

In the list below, put 'R' for renewable resources and 'N' for non-renewable resources.

1. oil
2. natural gas
3. biomass
4. nuclear
5. geothermal
6. water
7. wind
8. coal
9. solar
